

Year 5 Spring Snapshot: Planets and Palettes

Space Vocabulary:

Astronomy: the study of the Universe and everything in it.

Atmosphere: the gases held by gravity around Earth and around other planets. "Atmosphere" can also be used to talk about gases around stars.

Celestial body: a natural object that exists outside the Earth's atmosphere. Examples include stars, planets, asteroids, comets, and meteoroids.

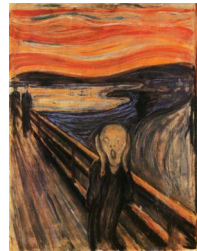

Gravity: a force that pulls matter together.

Orbit: the curved path that a planet, satellite, or spacecraft moves as it circles around another object.

Satellite: a natural or man-made object that orbits another object. A moon is actually a satellite.

Solar system: the solar system consists of the Sun and everything that orbits, or travels around, the Sun.

Post-Impressionism
(1886-1905)

Expressionism
(1905-1920)

Surrealism
(1920's-)

Abstract Expressionism
(1940's-1950's)

Modernism
(1960's-1970's)

Neo Expressionism
(1980's)

Art vocabulary:

Colour: Not just 'red' or 'green'! Are they warm or cold? Do they complement each other (go together) or contrast (clash)?

Line: Long or short? Heavy or soft? Dark or light? Straight or curved? Horizontal, vertical or diagonal? One direction or many? Varied or all the same?

Texture: This refers to what a piece feels like. How is the illusion of texture created using lines, colours, shapes and tones?

Tone: This means how light or dark a piece of art is.

Street Art
(1960's-)

Black Art
Movement
(1960's-1970's)
