

## Investigating Plastic Toys

Look in your toy box...

1. Find the **hardest** plastic toy that you can and **draw** a picture in this box. Then **write** a sentence in the box about why you think it needs to be so hard!

2. Find your most **flexible** plastic toy that you can then **draw** a picture in this box. Next, **write** a sentence in the box about why you think it needs to be so flexible!

3. Choose a few more plastic toys and discuss with your adult what the **similarities and differences** are between them.
