LO: I can say what I know and what I would like to know

Wild

What I already know

Below, or on a separate piece of paper, write down what you already know about nature and the natural world. What is nature? What animals and plants do you associate with the natural world here in the UK? What kinds of food come from the natural world? [HINT: Think back to My Forest from PSHE last week]

What I would like to know

Now write down what you would like to know in the form of a question. What things would you really like to understand about nature and the natural world?
