

PLACE VALUE

L.O: I can understand the place value of a digit

What number is represented here?

Clue: How many hundreds, tens and ones?

L.O: I can understand the place value of a digit

My number is 134

L.O: I can understand the place value of a digit

My number is 134

We represented 134 using dienes. How else could we represent it?

L.O: I can understand the place value of a digit

Representing 134

Dienes

Counting Shapes

L.O: I can understand the place value of a digit

Even more ways of representing 134

Partitioned into hundreds, tens and ones

$$134 = 100 + 30 + 4$$

L.O: I can understand the place value of a digit

5/1/21 – Today, we are going to play games to practise our knowledge of place value.

The links are in the Home Learning Task List – you should be able to click through to the games or type out the link into your internet browser.

Once you have done them, complete ‘Maths Task 5.1.21 – tell me which games you played and what you noticed.’

L.O: I can understand the place value of a digit

6/1/21 – Today, you are going to design a poster exploring different ways we can represent numbers!

Pick a number. On the poster, show me all the different ways you can represent that number. Include:

- words, digits, dienes, counting shapes, partitioning, any other ways you can think of!

Mild – pick a 2 digit number, e.g. 13, 27.

Spicy – pick a 3 digit number, e.g. 227, 563.

Hot – pick a 3 digit number with a zero in the 10s, e.g. 207, 509, 902.

L.O: I can understand the place value of a digit

7/1/21 – Here is a random number generator:

<https://numbergenerator.org/randomnumbergenerator/1-1000#!numbers=1&low=1&high=1000&unique=true&csv=&oddeven=&start=true&oddqty=0&sorted=false>

You are going to use this to generate the numbers for your questions.

Mild – generate a number between 1 and 100.

Spicy/Hot – generate a number between 1 and 1000.

L.O: I can understand the place value of a digit

Complete 'Maths Task 7.1.21'.

Use the random number generator to create your questions!

Unless you usually do Extra Mild, opt for Spicy or Hot!

If you choose to do Hot, you may have to generate numbers again before attempting a question as your number may be too small – e.g. if you know you have to take away 700, you are going to need to generate a number greater than 700!

L.O: I can understand the place value of a digit

Complete 'Maths Task 7.1.21'.

Use the random number generator to create your questions!

Unless you usually do Extra Mild, opt for Spicy or Hot!

If you choose to do Hot, you may have to generate numbers again before attempting a question as your number may be too small – e.g. if you know you have to take away 700, you are going to need to generate a number greater than 700!

L.O: I can understand the place value of a digit

Complete 'Maths Task 8.1.21'.

Sarah is given two calculations to work out:

101-9
410-9

Sarah says that:

"It's easier to do 101-9 than 410-9 because 1 is smaller in value than 4."

Do you agree with her?

Explain whether or not you agree with Sarah and why.
Show your working!
