# A Balanced Diet

We all have food that we like to eat lots of.

Talk  
about  
it!

What is your favourite food?

Click the  
words in  
**bold** to find  
out what  
they mean.

To be healthy, we need to have a balanced **diet**. This means we need to eat the right amounts of different types of food. When we do this, we get all the **nutrients** our bodies need.

# The Food Pyramid

This is a food pyramid. It is an easy way to work out how much of the different types of food we need. The smaller the section of the pyramid, the less we need. The bigger the section of the pyramid, the more we need.

# Fats, Spreads and Oils

Talk  
about  
it!

What kind of food do you think belongs in this group?

Fats, spreads and oils include foods like olive oil, vegetable oil, butter and margarine. Mayonnaise and some salad dressings are also included in the section because they have lots of oil in them.

We should only have a small amount of fats, spreads and oils because too much is bad for our hearts

Back

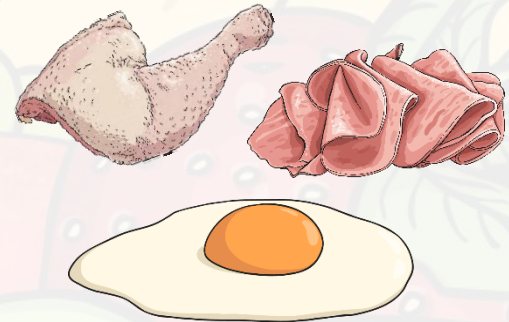

# Protein

Talk  
about  
it!

What kind of food do you think belongs in this group?

Meat, poultry, fish, eggs, beans and nuts are all sources of protein. Protein is a nutrient which is important to help us grow and help our bodies to repair themselves. These foods also have something called iron in them and this helps keep our blood healthy.

You should aim for two servings of protein a day and try to have a different kind each time. Examples of a portion include 100g of fish, 75g of meat and two eggs.

Back

# Dairy

Talk  
about  
it!

What kind of food do you think belongs in this group?

Milk, yoghurt and cheese are examples of dairy. Dairy foods have lots of calcium in them. Calcium is a nutrient which gives us healthy teeth and bones.

You should aim for three portions of dairy a day. A portion includes a glass of milk, a pot of yoghurt or 25g of cheese.

Back

# Carbohydrates

Talk  
about  
it!

What kind of food do you think belongs in this group?

Carbohydrates include food such as bread, potatoes, pasta, rice and wholegrain cereals like porridge. Carbohydrates are nutrients which give our bodies energy. These foods also give us fibre which helps us to go to the toilet regularly.

You should aim for between three and five portions of carbohydrates a day. Brown rice, wholemeal pasta and wholegrain bread are the healthiest choices. Two slices of bread, 75g of pasta and four small potatoes all count as a portion each.

Back

# Fruit and Vegetables

Talk  
about  
it!

What kind of food do you think belongs in this group?

Fruit and vegetables are the biggest section of the food pyramid and are the foods we should have the most of. Examples of these include apples, oranges, broccoli, carrots and onions. They include vitamins and minerals which help to keep us healthy. Fruit and vegetables also contain fibre which helps us to go to the toilet regularly.

The guidance has always been to have five portions of fruit and vegetables a day, but now doctors are encouraging people to aim for seven. To be healthy, you should try to eat lots of different coloured fruit and vegetables. Examples of a portion include an apple, two plums or three tablespoons of peas.
