

Year 4 tasks for week beginning 13.07.20

We're looking forward to celebrating the final week of Year 4 with you!

If you're staying at home or are in the key worker bubble, work through the task list as usual. Don't forget to send us some photos on the usual email address admin@fleet.camden.sch.uk. We'll be speaking to you on the phone on a Wednesday this week.

If you're in one of the bubbles in school, look at the task list or the English and Maths slides to find out which activities we'll do at school and which you can do at home. Then for the days that you're at home, you can choose any of the reading, Science, History, Art or music work from this list to do too.

Important Notice about Trumpets and Trombones:

Many of you have your instruments at home. Please keep them **at home until September**. You will continue learning them during Year 5.

Care reminders:

- Please keep your instrument **away from siblings and friends**.
- It is **your responsibility** to keep it in good repair. The instrument is **on loan** to you from school.
- **Practise regularly** so that valves and slides don't get stuck.

English – writing

This week we're recapping some more editing skills, finishing our stories and thinking about some special memories of Year 4.

If you're in Bubble A: we will do activity two and three in school on Monday and Tuesday, you can do activity one at home

If you're in Bubble B: we will do activity two and three in school on Thursday and Friday, you can do activity one at home

If you're working at home or in the key work bubble: do all three tasks and don't forget to take some photos and send them to us!

English – reading

There's a reading comprehension all about tribes of the rainforest for you to read.

We've included the answers so that you can mark your own work again.

Maths

If you are coming into school in **Bubble A**, we will begin this in school. After you've been in, you can play Guardians of Mathematica at home. If you're in **Bubble B**, you can spend Monday –

Guardians: Defenders of Mathematica

Wednesday completing the **Maths challenge resource page** and playing the **fraction games** that

we started in school last week. Choose whichever game you didn't try already, or teach one you know to someone in your family!

If you're **not coming into school at all, do all the lessons below at home.**

This week we are going to find [find fractions of amounts](#) in Lesson 1 and then [practise problem solving with fractions](#).

All the info is on each webpage. Complete the 3 activities. The 3rd one is an online game! For Lesson 2, you can check your answers for Activities 1 & 2 by clicking the link under each activity.

Science

This activity can be completed at home by **all children.**

Last week we started learning about endangered wildlife, creating posters about them. This week, we're going to write a newspaper article about your chosen animal. The Science resource page has all the information.

Art

This work can be completed at home by **all children**

We'd like you make a piece of art work this week celebrating the end of our rainforest topic. It can be whatever you want: a model/ sculpture, painting, collage, sketch, drawing.... You can use any materials: paints, pastel, colouring pencil, felt tip, fabric, coloured paper, pencil....

Think about which part of the topic you enjoyed the most! Did you have a favourite animal or plant? Was there a text you especially enjoyed?

History

This work can be completed at home by **all children**

It's our final week learning about the Incas!

Have a look at the links here: <https://www.dkfindout.com/uk/history/mayans/what-did-maya-aztecs-and-incas-eat/> and <https://www.dkfindout.com/uk/history/incas/hunting-and-fishing/>.

Then write a menu for an Incan family. You could do a menu for a day, with breakfast, lunch and dinner, or a menu for dinner, with a starter, main course, dessert and drink. You could also decorate it if you like!

Music

This activity can be completed at home by **all children.**

Get moving and create turntable inspired choreography with Sadler's Wells...

Follow [this link](#) to learn more.
