

Year 5 Science task week beginning 18th May

How the Earth's tilt creates seasons.

You can either print off and complete this worksheet, or create your own labelled poster to explain how we get different seasons.

Label the positions in Earth's orbit with the correct season that the Northern Hemisphere is in. Explain how you know and some other facts you know about each season.

summer winter autumn spring longer shorter northern southern
warmer colder tilted towards away from orbit hemisphere month
