

Year 5 science – week beginning 6th July

Space Project- Section 5

So far your space project should have the following sections:

1. Names and order of your planets
2. Details about a planet/planets
3. The sun
4. Asteroids, comets and meteors.

This week I would like you to research and create a section on stars and their constellations. When you are researching, lots of the websites and videos are made in the USA and some of the names they use for constellations are different. One of the videos below explains this in more detail.

Here are some websites to help you get started
