

L.O.: I can add and subtract fractions

Convert the fractions to have the same denominator by finding a number they both fit in to (e.g. 3 and 6 both fit in to 6. 3 and 5 both fit in to 15). Don't forget to do the same to the top as you do to the bottom!

Then add/subtract the numerators. Do your working on a piece of paper. You don't need to print this!

SPICY! (scroll down for HOT!)

$$\frac{5}{6} + \frac{7}{12} = \boxed{}$$

$$\frac{3}{4} - \frac{3}{8} = \boxed{}$$

$$\frac{2}{3} + \frac{5}{12} = \boxed{}$$

$$\frac{7}{8} - \frac{1}{4} = \boxed{}$$

$$\frac{3}{4} + \frac{1}{12} = \boxed{}$$

$$\frac{5}{8} - \frac{1}{2} = \boxed{}$$

$$\frac{11}{12} + \frac{1}{4} = \boxed{}$$

$$\frac{5}{6} - \frac{1}{3} = \boxed{}$$

HOT!

$$\frac{1}{4} + \frac{5}{8} + \frac{1}{2} = \boxed{}$$

$$\frac{18}{20} - \frac{3}{5} - \frac{1}{10} = \boxed{}$$

$$\frac{5}{6} + \frac{1}{12} + \frac{1}{2} = \boxed{}$$

$$\frac{7}{10} - \frac{1}{5} - \frac{3}{30} = \boxed{}$$

$$\frac{1}{4} + \frac{1}{8} + \frac{1}{16} = \boxed{}$$

$$\frac{5}{6} - \frac{11}{24} - \frac{3}{12} = \boxed{}$$

$$\frac{11}{12} + \frac{5}{6} + \frac{1}{2} = \boxed{}$$

$$\frac{23}{24} - \frac{3}{12} - \frac{1}{3} = \boxed{}$$
