**Task: Make the numbers circled in red by multiplying 3 numbers together from the blue box. HOWEVER—You can only use each number once (there will be one left over). So if you use '2' to make 60, you can't then use it to make 90 or 112.**

(60)   (90)   (112)

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

Task: As above, but this time there are 4 target numbers to make. There are 12 numbers to use (in the blue box). You can use each number once.

(84)   (180)   (132)   (240)

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |

Find a different solution from the one above!

(84)   (180)   (132)   (240)

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
